

This exclusion zone kit for electric vehicles secures a work area around an electric vehicle. This kit is composed of 4 posts and 4 weighted bases ensuring a very high level of stability. Two warning signs are included to warn of the danger. It is easy to set up and ensures security of the workspace.

● PRODUCT FEATURES

- These signposts are equipped with a 4-way head and are delivered with 25 m of polyethylene chain. Ø 6 mm with anti-UV treatment.
- The posts are made of PVC tube Ø 65mm which makes them very resistant for long term use.
- The weighted 6 kg rubber base allows indoor and outdoor use even in high winds of more than 100 km/h.
- Marker and base can be unlocked with a simple quarter turn.

● ADVANTAGES

- Already weighted base of 6 kg
- Very high stability
- Long lifespan

100 km/h
